

RK TECHNOLOGY

COMPANY PROFILE

COMPANY PROFILE

In a state of ever-growing and rapidly evolving market for information technology and system integration, recognizing the need of a company that can offer high quality and take the lead on the Indian market, a group of highly qualified engineers founded the **"RK TECHNOLOGY"**.

In July 2015 the company established its office in Malad West and started its activities with the sales and services of computer equipment, Security equipments and telecommunication services in Mumbai.

The main objective of the company is to serve customers in such areas as production, trade, Schools, Manufacturing and Warehouses. The idea of its creators is to offer its customers complete solutions from the study, design, hardware and software supply, tips on what and where to be purchased, service and training.

Mr. Raja is the **Director** of **“RK Technology”** counts over 15 years experienced in the **IT field** and has been involved in the entire spectrum of activities specially in software's and hardware's services.

Having wide experience working in Dicitex Furnishings Ltd one of the largest Textile Company in India for 11 years as EDP Manager, and 4 years experience with Megha compusoft Pvt. Ltd as senior IT Executive. He has managed ERP implementations and the IT infrastructure, Procurements, License compliances for large private organizations.

Mr. Rajesh is the **Director** of **“RK Technology”** has enormous knowledge in setting up **centralized attendance system, Access controller and CCTV installations.**

He is the one who has involved in many projects with L&T,ONGC, International Airport, Emami frankrose, IFB, Cinemax, Just Dial, Gujarat Electricity, and Builders Project working with CD Consultancy services for many years...He has managed to implement all these automation items all over India.

OBJECTIVES & PRINCIPALS

There are 11 highly qualified employees working in the company, specializing in the following areas: Hardware, software, communications, commerce and services. In order to ensure the successful business, the company founders are committed to the following main principles :

- **QUALITY** : We invests time, money and resources necessary to ensure the desired quality and growth in terms of rapidly evolving market.
- **SERVICE** : The service must complement quality. Only by understanding the needs of its customers the company can provide high quality services and maintain its leading position on the market.
- **EFFICIENCY** : The company believes that the best way to improve productivity is to provide its people with the opportunity to learn and improve their personal skills, contribute to the work process and be satisfied with their achievements
- **INNOVATION** : Long-term success can only be assured by cultivating new ideas. That's why the company encourages its employees to be creative, and gives them the means to see their ideas realized.

The continued growth of the company requires maintaining the staff qualification in order to assure the ongoing quality of services offered by the company by means of staying in touch with the latest achievements in the field. The staff participates in various training programs, seminars and conferences of the leading companies in the information technology industry.
